PROFILE

Aspiring Mechanical Engineering student transitioning into a Full Stack Web Developer, with hands-on experience in building responsive web applications using HTML, CSS, JavaScript and MySQL. Developed real-world projects with features like authentication, real-time updates, and cloud integration using AWS. Passionate about creating scalable, user-focused applications and continuously learning modern web technologies.

EDUCATION

2022 – present Coimbatore, India	Bachelor of Engineering - Mechanical Engineering, Rathinam Technical Campus	CGPA: 8.3
2021 – 2022 Thoothukudi, India	HSC, Spic Nagar Higher Secondary School	Percentage: 81%
2019 – 2020 Thoothukudi, India	SSLC, Spic Nagar Higher Secondary School	Percentage: 78%

INTERNSHIP

04/2025 – 07/2025	Infotact Solutions, Web Development Intern <i>Duration: 2 months</i> - Gaining hands-on experience in end-to-end web application development. - Designing and building dynamic, responsive user interfaces and robust back-end systems. - Collaborating remotely with a team to practice real-world coding workflows, API integration, and database management.
-------------------	---

SKILLS

Java	Cloud Computing (AWS)
Html/Css	Javascript
My SQL	React.js
Git and Github	UI and UX

PERSONAL PROJECTS

Foodie Express - A Modern Food Delivery Platform

- Frontend Development:** Built a fully responsive and interactive user interface using HTML, CSS, and JavaScript, featuring modern glass-morphism UI design and full PWA (Progressive Web App) support for a native-like experience.
- Backend & Database:** Developed a secure backend using Node.js and Express.js; implemented authentication, order management, and data storage using MySQL.
- Features & Deployment:** Integrated real-time order tracking, shopping cart, checkout flow, chef dashboard, and admin panel, deployed using GitHub Pages with CI/CD pipelines.

AWS S3 Storage Monitor (Lambda + SES + CloudWatch + DynamoDB)

- Developed a serverless system using AWS Lambda and CloudWatch to monitor S3 bucket storage and usage trends.
- Integrated Amazon SES and SNS for automated real-time alerts and stored historical data in DynamoDB for analysis.
- Implemented secure, scalable, and cost-efficient event-driven architecture using IAM roles and KMS encryption.

CERTIFICATES

- | | |
|---|--|
| • Coursera Certified: Meta AR Developer. | • Coursera Certified: Deep Neural Networks with PyTorch. |
| • NPTEL Certification: Cloud Computing Indian Institute of Technology, kharagpur. | • UIPATH Certified: Automation Developer Associate Training. |
| • AWS Academy - Cloud Foundations - Training Badge | • AWS Academy - Cloud Architecting - Training Badge |
